

These amendments are designed to adopt suggestions made by the Examiner and are further meant to help place the application in condition for allowance. Many of the objected-to claims have been withdrawn, thereby simplifying the prosecution.

These amendments are being made on the same day as the Revised Response to First Office Action, and, as such, are equivalent to a reply made to an Office requirement after a first reply is filed.

AMENDMENTS TO THE SPECIFICATION begin on page 14 of this paper.

AMENDMENTS TO THE CLAIMS are reflected in the listing of claims which begins on page 16 of this paper.

REMARKS/ARGUMENTS

I. AMENDMENTS TO THE SPECIFICATION:

The attached amendments to the Specification provide two specific examples of the utility stated in various locations in the Specification, including paragraph 0054: "the principle application to be described for this invention ... is to find alternate Email address(es) for an entity based on an existing, known Email address." (See, also, paragraphs 0021, 0023, 0024, 0075, 0080-0085).

The amendments are thus supported by the original Specification, in that both paragraphs merely give two simple, concrete examples of finding alternate Email address(es) using an older Email address.
